

Joomla! Testimonials

Port Orchard, WA - Chamber of Commerce:

I now consider myself a webmaster! I actually can say that with all earnestness! Maybe not the best, most perfect or well experienced webmaster, but a (part-time)webmaster nonetheless! And honestly, working with Joomla has made it possible for me to say that. I actually am webmaster/administrator for three websites: one is a registration template website that I have little control over or flexibility with. The second-I use the software program Contribute. While it is doable and relatively simple, it is not nearly as easy as Joomla, nor does it allow me to do everything I can with the Joomla website I administer-and mistakes are more difficult to 'fix'.
I recommend working with Joomla!
